MEMORANDUM FOR Commander, USACIDC, ATTN: CIOP-COP-OP, 6010 6th St.,
Fort Belvoir, VA 22060

SUBJECT: RFI (0212-04-CID001)

1. The review of ROI # 0007-04-CID259-80133 determined the investigation was operationally sufficient and was administratively insufficient. A supplemental ROI needs to be submitted upon receipt the final autopsy report.

2. The review disclosed the following deficiencies. The investigation did not conduct a crime scene examination or explain why such an examination was not conducted. The investigation did not conduct interviews of those witnesses who found the victim and took his body to the military police guards. There was no effort made to interview the alleged brother and son of the victim who were reportedly present at the prison at the time of death. The Final Report of Investigation (ROI) inappropriately contains the caveat for initial reports where the report is a preliminary investigation and may change prior to completion of the investigation. The investigation has not yet received the final autopsy report.

Here is the AIR we did concerning the detainee that died on 8 Jan 04. We did not obtain sworn statements from any involved. From all accounts, it appears that this was a natural death (Heart Attack). If you need anything else, just let me know.

I'll get guys on this telephonically for now, but can you take a look into the particulars of the death scene, if any? Really, all I need is the death scene secured "if" it smells like anything suspicious. Our guidance in non-suspicious prisoner deaths (ie. cardiac arrest) is to report it SSI Only. Thanks.
